Executive Summary

This report synthesises web sources, academic papers and datasets. Findings point to steady growth with notable constraints, and it highlights where further evidence is needed.

Key takeaways

- Growth is steady across indicators.
- Costs and policy are the main levers.
- Data coverage remains uneven.

1. Introduction

The evidence reviewed points to a clear and consistent picture [1]. Several independent sources report steady progress alongside persistent constraints [2, 3].

- Growth continues across most indicators [1]
- Cost and policy are the main levers [2, 3]

A second paragraph elaborates on nuance, trade-offs and uncertainty in the underlying data [1].
